Summary

Motivated Computer Science undergraduate with hands-on experience building AI-powered and full-stack web applications using Python, JavaScript, React, Node.js, and SQL. Developed real-world projects involving Generative AI, API integration, geolocation, and responsive dashboards. Strong foundation in data structures, algorithms, and software engineering with an interest in AI model evaluation.

Skills

Programming: Python, Java, C, SQL

AI & Generative AI: Gemini API, Prompt Engineering, AI Model Evaluation

Web Development: HTML, CSS, JavaScript, React, Node.js

Database: SQL

Core Concepts: Data Structures & Algorithms, OOP, Operating Systems

Tools: Git, VS Code

Experience

Web Development Intern

October 2025 – January 2026

Collegedunia (Live Project)

- Worked on a live web development project, contributing to frontend development using HTML and CSS.
- Assisted in designing and structuring responsive web pages for better user experience.
- Collaborated with the team to improve website layout and usability.
- Gained practical exposure to real-world development workflows and project handling.

Projects

- **ScamShield AI** (<https://github.com/parthabit/scamshield-ai>)
AI-powered scam/phishing detection web app; integrated Gemini API to flag fraud patterns in URLs and messages in real time.
- **AI Study Helper** (<https://github.com/parthabit/ai-study-helper>)
Multi-tool CS study platform using the Gemini API (summarize, quiz generation, concept explainer, code debugger, flashcards) with image-upload support for notes and error screenshots.
- **Clean Bengal** (<https://github.com/parthabit/clean-bengal>)
Built a responsive civic engagement platform for reporting cleanliness issues using GPS location, map integration, photo uploads, and an authority dashboard.
- **Job Tracker** (<https://github.com/parthabit/job-tracker>)
Full-stack job application management platform with interview pipeline tracking, company records, deadlines, and responsive dashboard analytics.

Awards & Certifications

- **Computing Using Python (100 Hours)** – RCC Institute of Information Technology, supported by Ministry of Electronics & IT, Govt. of India (2024)
- **Google Cloud Computing Fundamentals & Generative AI** – GDSC RCC Institute (2023)
- **AI for Entrepreneurship** – Intel Technology India (Skill India Digital Hub) (2025)
- **Smart India Hackathon** – Participation, IIC RCC Institute (2024)

Education

B.Tech in Computer Science & Engineering

Expected Graduation: June 2027

RCC Institute of Information Technology, Kolkata
